

# Recommended Water Budget

Thank you for participating in our Landscape Irrigation Water Budget Program. The following is your customized water usage profiles for the last two years. EBMUD records indicate that this account primarily serves landscape irrigation. The graphical description compares your measured water usage versus your budgeted water usage for each billing period.

Customer Name: Crown Harbor Hoa  
 Service Address: 1356 Crown Dr  
 City: Alameda  
 Account #: 27356200001  
 Meter #: 14831909  
 Est. Irrigated Area(sq. ft): 203955

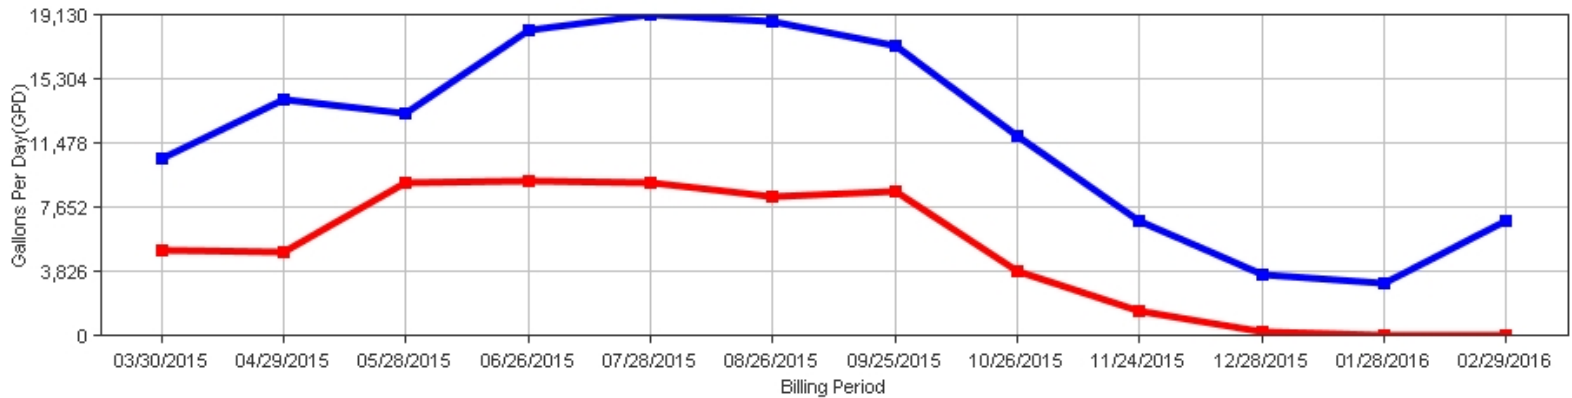

Irrigated Area at 1356 Crown Dr

Water Budget Summary	Used	Budgeted
Gallons used last 12 months	433,840	1,535,754
Gallons used previous year	1,377,068	2,821,312

Used: 1,810,908 Budget: 4,357,066 Percent: 42%

Congratulations, meeting your water budget saved you \$ 14,958

\*ET=Represents the estimated water need of cool season grass (in inches) for each billing period. The Water Budget Calculation does not use rain, typically irrigation systems can be turned off for the winter months of November, December, January, and February. The Maximum Allowable Water Budget, effective January 2010, is calculated using the new Model Efficient Landscape Ordinance from the State of California, Department of Water Resources (DWR). If you feel the irrigated area is not accurate or would like more information on this program, contact EBMUD at (510) 986-7615.
